

PRACTICAL NO 12

AIM: Combining datasets vertically (concatenation) using rbind() (R).

OUTPUT:

The screenshot displays the RStudio interface for Practical No 12. The Source pane on the left shows the R script, which includes loading data, checking structure, and combining datasets using rbind(). The Environment pane on the right shows the loaded datasets and their dimensions.

R Script (Source Pane):

```
R 4.5.2 - ~/ABHISHEK DINESH SINGH /
> # Load Data
> data(iris)
> survey_df <- read.csv("survey.csv")
> # Check structure
> print(names(iris))
[1] "Sepal.Length" "Sepal.Width" "Petal.Length" "Petal.Width" "Species"
> print(names(survey_df))
